

FAMILY PLANNING EXTENSION SERVICES

This program (also known as SOBRA Family Planning Services-FPS) **provides family planning services only** for a maximum of 24 months to SOBRA women whose pregnancy has ended and who are not otherwise eligible for full Title XIX services. Members eligibility will be determined every 12 months. These members are eligible for the Family Planning services listed below. FPS members are not covered for any other services provided by Care1st, unless that service is related to a family planning service.

If your member with FPS requires primary care services, which may include members determined to have a sexually transmitted disease, you may direct them to no/low cost clinics or agencies. Please contact the MCH department or your Provider Representative for assistance.

FAMILY PLANNING SERVICES

- Family planning services are covered for both male and female members. Physicians and other practitioners should discuss and document in the medical record that each member of reproductive age has been notified verbally or in writing of the availability of family planning services.
